DETAILED ACTION

Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-16, drawn to Having message notification under the title Radiotelephone system, classified in Class 455, subclass 412.2.

Group II. Claim 17, drawn to Privacy, lock-out, or authentication under the title Radiotelephone system, classified in Class 455, subclass 411.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this instant case, invention Group I has separate utility such as for sending message notification without using messaging service system whereas Group II has separate utility such as for using an authentication code. Each feature has its own patentability. See M.P.E.P. § 806.05(d).

3. Because these inventions are distinct for the reason given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated proper.

4. Examiner telephoned Miss Judith A. Szepesi on 08/30/04 and left a message. Examiner didn't receive any response. A provisional election was not made to prosecute the invention of any of the Groups I and II. Affirmation of an election must be made by applicant in responding to this Office action.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2645

application. **Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).**
